PLEASE READ CAREFULLY BEFORE ORDERING

GUARANTEE

We guarantee to do our utmost to please our customers. We mean to send out only clean bulbs, free from disease and insects. Any claims or complaints in regard to bulbs should be sent soon after receiving the bulbs.

Of course if any bulbs are not true to name you can not make claims for that until after blooming. If anything goes wrong we always try to make a satisfactory settlement with the customer. This is the only way that anyone can hope to build up a business.

However we do not guarantee in any way **the bulbs you harvest** as unsatisfactory growing conditions or disease in the soil are beyond our control and we cannot be responsible for the crop you harvest except that if bulbs should not be true to name we will be glad to replace them or make a satisfactory settlement.

ORDER EARLY

Many varieties are sold out early. Order promptly to avoid disappointments. But late orders will receive careful attention. **Important. Open all packages upon arrival.**
Keep in a cool, dry place.

TERMS

Our terms are Net Cash before shipment unless arranged otherwise. 25% will hold winter orders until March first. Orders not fully paid for will be sent C. O. D. for the balance at time of shipment to you.

GRATIS

All orders are filled with a liberal overcount. Gratis of varieties other than ordered are included in each customer's package. We strive to keep our prices as low as other reliable growers, and will gladly include overcount to cover any reasonable reduction after list is issued.

POSTAGE

All orders amounting to \$2 or over will be sent prepaid to any point in United States, if taken from our **Prepaid List**. No single item accepted for less than 20 cents. Please enclose ten cents for orders less than \$2.00.

PLEASE READ CAREFULLY

RUSH ORDERS. We always do our best to get out rush orders as soon as possible.

AIR. MAIL. If living at a distance use air mail if you are in a hurry. We will get the orders so much sooner and will often save days in time. **Do not send letters by special delivery.** We get regular mail quicker.

We urge that you place your orders early so that you may not be disappointed. Each year we are unable to fill late orders for a number of varieties. Orders are segregated as soon as possible after being received but will not be shipped until after danger of freezing is past, unless you request otherwise. However, bulbs can be sent any time.

**PLEASE MAKE MONEY ORDERS PAYABLE AT THE SEABROOK,
NEW HAMPSHIRE, POST OFFICE**

—IMPORTANT—

Please Select Second and Third Choice, if Possible

**If no second choice is given we shall have to substitute as we are very short of help and
must cut down on our correspondence**

**BULB SUPPLIES MAY BE SHORT AGAIN THIS YEAR. WE WILL FILL YOUR
ORDER IN ROTATION, SO PLEASE ORDER EARLY.**

**All Stock Subject to Prior Sale. Obvious Errors in Prices are Cancelled
VARIETIES MARKED "NO DISCOUNT" CAN NOT BE USED AS EXTRAS**

A Message of Thanks

Again we thank you for your patronage, and we solicit a continuation of same. We will continue to give your Orders our same careful attention. This is our Twenty-Fourth Annual Catalog, and we want to say our "Glads" were wonderful this year—just about the best ever. We harvested a good crop of nice clean bulbs.

The picture on our Catalog we think gives you the best advertisement for our bulbs, that we know of. It shows you at a glance, our field, and where your bulbs are grown.

You will notice we are introducing two new varieties this year, and we are sure they are just what the Public and Florists are looking for. BARBARA-DEE is the loveliest color of Fuchsia Purple, and ZEB has such lovely, slightly ruffled, white Florets, which when fully opened have a pale lavender sheen overall. We know you will want to stock up on these varieties. See Page 3 for description. Thanking you again.

HAPPY NEW YEAR TO ALL

SEABROOK NURSERIES,

Seabrook, N. H.

GLAD-I-O'LUS:—

Please pronounce this wonderful flower right. The accent on the O'.

GLAD-I-O'-LUS and use the same form for both singular and plural. It hurts to hear one say GLADIOLA or GLADIOLIS!

DO GLADS CHANGE COLOR?

GLADIOLUS do NOT Change Color.

We have been asked this question hundreds of times. So many varieties divide or split. Suppose you plant twelve mixed bulbs, when you dig them you find you have about thirty bulbs. That is the reason you have more of one color than others. Many varieties do not divide, so you dig only one new bulb on the one you planted. And some not quite so strong just die out in the ground.

Of course glads grow older each year, you dig a new bulb not a young one. So it is best to keep adding more bulbs to your collection each year.

PLANTING TIME

Our planting time here is around APRIL to JUNE, so when ordering your bulbs to be sent to you at planting time, please state when planting time is in your locality. It will help us a lot.

WHEN YOU CHANGE YOUR ADDRESS

Please notify us so we can change our files. Also please give your old address at the same time. This will save us many catalogues and you will receive yours. **THANK YOU.**

C. O. D. ORDERS

Please do not ask us to send an order C. O. D. without your making a deposit on it. If it is a small order we shall have to ask for a deposit of at least a dollar. Larger C. O. D. orders should be accompanied by 25% of the value. **We cannot send out any more C. O. D. orders without at least some deposit.**

CARE AND CULTURE OF GLADIOLUS

Select a sunny location away from the roots of trees and shrubs. Plant about six inches deep, having bulbs five inches apart.

Place bulbs in a well worked trench in staggered or zigzag row— . . . and cover at first with about two inches of loam; when shoots begin to appear, work balance of loam into the trench. At all times keep the soil loose. As an aid to producing larger blooms work in fertilizer around the plants when about a foot or more in height. At the time flower spikes appear, abundant watering is very beneficial.

Bulbs should be dug before leaves turn brown. Cut stock close to the bulb, spread them out to dry for two or three days in a sunny location and then place in an open shed or room for two weeks or more before storing them away in a cool dry place. Keep them spread out and not over three inches deep, give bulbs an occasional airing during the winter. DO NOT remove the husks as this protects the bulb during storage.

When cutting flowers, leave at least four leaves remaining on the plant. Positive injury to the blooming qualities of the bulbs for the following year will occur if this precaution is not heeded.

For cut flowers, cut the spike when first bud fully opens. The remaining buds will open nicely and give a longer period of bloom and greater enjoyment.

Remove wilted blossoms, change water and cut off a portion of the stems each day. These will then fit in a smaller vase.

FORMULAS FOR DIPS AND SPRAYS FOR THE CONTROL OF THRIPS

Lysol Dip

4 tablespoons of Lysol

3 gallons of water

or

1 pint of Lysol

25 gallons of water.

Soak bulbs in the Lysol solution for at least 3 hours and no longer than 6 hours; soak bulblets overnight or 12 to 14 hours. After bulbs or bulblets are removed from the solution, allow to drain for 30 minutes and plant same day as treated, preferably while still wet.

The thrips problem is now satisfactorily solved—a great blessing to all concerned.

Thrip Spray

2 ounces Tarter Emetic

2 ounces brown sugar

3 gallons water

Mix well and spray weekly after the foliage is in third leaf.

or

½ lb. DDT (50%)

½ pint liquid soap (Germicidal)

25 gallons of water

For small plantings the following DDT spray is reported as giving good results:

1 rounded teaspoonful DDT (50%)

½ teaspoonful Dreft

1 gallon water

DUSTING—The easiest and most efficient means of controlling Thrips is to dust the foliage of the plants with 5% DDT. Many types of dusters are available and one can be obtained to suit your size planting. Begin dusting when plants are in third leaf and continue about every two weeks. If this is done you can say goodbye to Thrips!

CAUTION: Lysol, New Improved Ceresan, Tarter Emetic, and DDT are poisonous and care should be taken in handling and storing these materials.

NAPHTHALENE FLAKES, 2 POUND PACKAGE, 60c, WITH BULB ORDERS

INTRODUCING TWO NEW GLADS FOR 1948

BARBARA DEE

Barbara Dee: Color and size Classification F-470. Color is a clear warm shade of Fuchsia Purple, with darker feather markings, on lower petals. Formal type about five inches. Triangular shape, and wide open florets, eighteen to twenty buds, six to seven open, seven to ten showing color. Flowerhead about twenty-five inches. Height in field about forty-five inches. Bulblet production and germination good. Blooms in about seventy-five to eighty days. Just the color the Florists are looking for. Barbara Dee received Honorable Mention at the Pre-Seedling show, August 3rd, 1947 at Boston, Mass.

\$5.00 each, Large and Medium. No small or Bulblets this year.

ZEB

Zeb: Has attracted much attention in the garden for three or four years. It is a very tall straight growing Glad, without crooks, very good placement, dark green foliage, about six to seven four inch florets, ruffled, open on a twenty-six to twenty-eight bud spike. Its color is white with feathery purple blotches on lower petals, and when wide open, has a beautiful lavender cast all over, which gives it a marked distinction. A good propagator and germinates well. It is quite early, blooms in about seventy-two to seventy-five days, stands up well in hot weather, and will make an excellent commercial.

\$5.00 each, large and medium—no small or bulblets this year.

ROCKWELL'S BOOK ON GLADIOLUS

Gladiolus, by F. F. Rockwell. Recommended as the "best brief guide on gladiolus growing." It tells how to plant, fertilize, and cultivate; how to grow from seed or bulblets; how to harvest and cure; how to handle for cut flowers and every other detail needed for success with this popular flower, 45 illustrations, 78 pages. Prepaid \$1.25.

SIZE IN BULBS

In Retail list, the large bulbs that we offer are 1¼ inches and over in diameter; medium size are ¾ inch up. For Wholesale sizes see list.

Beside the originator's name we have listed the approximate flowering season of each variety as follows:

E—Early, under 70 days from planting.

EM—Early Midseason, 70-80 days from planting.

M—Midseason, from 80-90 days from planting.

LM—Late Midseason, over 90 days from planting.

L—Large

M—Medium

S—Small

Blts.—Bulblets.

ON FAIR SIZED ORDERS, EXPRESS is safest and best especially in the winter time; we advise express if you are situated so as to get free delivery by the express company.

Identification of Gladiolus Blooms

Do not send a single bloom inside a letter. When the letter goes thru the stamping machine at the post office all the moisture in the bloom is pressed out on the writing in the letter and is so blurred one can not make out its meaning and the crushed bloom so damaged it can not be identified. Just send a part of the stem with 3 or 4 buds on and leave enough stem for us to place in water for the bud to open. Do not send the very tip of the spike and do not put any wet paper or anything moist whatever in the package.

I had the pleasure of seeing your gorgeous display of gladiolus at the August Exhibition of the N. E. G. S.

Some of your display had a greater appeal to me than others particularly your Chamouny and Seabrook Beauty. Hoping to improve my stock of bulbs, may I have your catalogue.

Sincerely yours,

No single item accepted for less than twenty cents

Do not split quantities as listed. Where a variety is listed at 2 for 25c, or 3 or 4 for 25c, do not order 1 or 2 at a lower price. There is no profit in any items for less than twenty-five cents.

LABELS

Everyone who grows bulbs under name will want labels. There are many different kinds on the market but think the best cheap label is a painted wooden one. However, in using the wooden labels they really should have a coat of varnish after the name is written, otherwise the paint will weather off taking the name with it. 12 x 1½, 25 for 50 cents. 100 for \$1.80.

THE GARDENADE --- Price \$3.50

14" LONG, 11" WIDE, 12" HIGH

The scientifically designed hand holds give you just the proper balance making it easy to lower yourself without jar or back strain. A slight lift with your arms, roll slightly backward and you rise without effort. Get your Gardenade today and make your gardening a pleasure.

The Gardenade combines a kneeling pad and a convenient rack for your garden tools.

Your knees rest on a large, soft sponge rubber pad. As the pad is flat on the ground, you can work in a comfortable position. Sturdily constructed, all metal and painted with green enamel, it will give you life-long service.

The Gardenade can also be used in the home when it is necessary to kneel—cleaning floors, baseboards, polishing bath tub, waxing, etc.

Price \$3.50

Please add 25c extra for postage for each Gardenade, or we will prepay postage with a retail order for Gladiolus bulbs amounting to \$5.00 or over.

The first order of Gladiolus bulbs I bought from you turned out to be the best I have ever had. They were the loveliest flowers in the garden and created lots of attention from all my friends. Thanks so much,

Albany, N. Y.

ALYCE C. MUNSON

My order came thru in very good shape, better than any I have ever received from others. They were packed so nice and so many extras and over count, too. Thanks a lot.

Notes on the Life History of Gladiolus Thrips

Taeniothrips Simplex (Morison)

In the northern states, where corms are harvested and stored during the cold months, Gladiolus thrips apparently do not survive out of doors. Leaving tops in the field, exposed to the weather will cause all thrips on the foliage to die. Piles of foliage or clearing shucks should be scattered or burned to insure the destruction of all thrips attempting to over-winter in Gladiolus trash piles.

Thrips carried on the corms to storage will breed at temperatures above 50°F. Unless treated, corms stored in basements where winter temperatures are generally 60°F, or above are almost sure to be injured by thrips before spring. Several generations may develop in warm basements during the winter months. Feeding of thrips on the corms will cause discolored, hardened areas on the corms. Severely injured corms dry abnormally, resulting in shrunken, misshapen planting stock. Such stock is slow to start growth and may not produce satisfactory spikes.
